

OP-773_Test_Cases

Job Family Group need to be mapped as standard mapping for enhanced WD outbound integration

Summary: Job Family group is a new LOV that needs to be added as a standard mapping while replicating a 'requisition' from WD to TLK

Pre-Conditions:

1. Login to Workday:

URL: https://impl.workday.com/lumesse_pt1/login.html

User Name : lmcneil

Password : Lumesse01!

2. Login to Talent Link:

URL: <https://emea3.mrtdtalentlink.com/tlk/pages/restricted/hostpage.jsp>

Company Name : API Partners

Login : anna.styrylska

Password : Lumesse01!

3. Create a requisition in Work Day(P-00480) which should be posted to TLK

Sno	Step description	Expected Behaviour	Comments
TC_WD_01	While creating the requisition, set the job family and job category	The elements, job family and job category should be set	
TC_WD_02	Click on the job family and set the family group	The element, job family group should be set	
TC_WD_03	Create the requisition and submit all its approvals	The requisition should have got created in WD with its unique requisition ID generated	
TC_OP_04	Let the requisition created be replicated in to TLK	The requisition should have got replicated into TLK with its internal ID generated	
TC_TLK_05	Check in TLK, if the requisition has got all the values populated appropriately	All the values given while creating the requisition should have populated as per their mappings	
TC_TLK_06	Check if Job family, Job Category and Job family group values have populated correctly	All the values given while creating the requisition should have populated as per their mappings
